

METAL

CARE + MAINTENANCE

Our outdoor metal furniture is crafted from marine grade stainless steel and aluminum for exceptional strength, corrosion resistance, and longevity in demanding hospitality environments. Finished in powder coat or PVD for beauty and performance.

MAINTENANCE LOW

OUTDOOR PERFORMANCE

DAILY CARE

- Wipe surfaces regularly with a soft cloth to remove dust, salt, and debris.
- For general cleaning, use warm water with a mild soap or pH-neutral cleaner.
- Rinse thoroughly with clean water and dry with a soft cloth.
- In coastal environments, frequent rinsing is recommended to remove salt buildup.

Routine cleaning preserves the finish and extends the life of your furniture.

POWDER COAT FINISH

- A durable, baked-on coating that provides excellent color retention, weather resistance, and scratch protection.
- Clean with mild soap and water.
- Avoid abrasive pads, solvents, or harsh chemicals.
- Touch up minor chips to protect the coating.

PVD FINISH

- Physical Vapor Deposition creates a thin, molecular bonded layer for superior durability and a luxurious finish.
- Clean with mild soap and water using a soft cloth.
- Avoid abrasive cleaners and scouring pads.
- PVD is highly resistant to tarnish, scratching, and fading.

MARINE GRADE STAINLESS STEEL

- Resistant to rust and corrosion, even in coastal and saline conditions. Ideal for high traffic and heavy use.
- Use mild soap and water.
- For stubborn marks, use a non-abrasive cleaner made for stainless steel.
- Rinse and dry to prevent water spots.

ALUMINUM

- Lightweight, rust-resistant, and ideal for outdoor use. Engineered for strength and long-term performance.
- Clean with mild soap and water.
- Avoid strong acids or alkaline cleaners.
- Rinse and dry to maintain appearance.

WHAT TO AVOID

- Abrasive pads, steel wool, or scouring powders.
- Harsh chemicals, bleach, or solvent-based cleaners.
- Pressure washers or steam cleaning equipment.
- Dragging furniture across rough surfaces.
- Prolonged exposure to standing water or harsh marine environments without regular cleaning.

BUILT FOR OUTDOOR HOSPITALITY

Our metals are selected for their strength, longevity, and recyclability—supporting responsible design and reducing environmental impact.
