

TEAK

CARE + MAINTENANCE

Teak is a premium hardwood prized for its strength, natural oils, and timeless beauty. With proper care, teak will age gracefully and provide exceptional performance in hospitality environments.

AT A GLANCE

DURABILITY	MAINTENANCE	NATURAL BEAUTY	OUTDOOR USE

DAILY CARE

- Wipe surfaces regularly with a soft, damp cloth to remove dust, dirt, and spills.
- Use warm water with a few drops of mild soap if needed.
- Rinse thoroughly and dry with a soft cloth.

Avoid harsh chemicals and abrasive cleaners.

LONG-TERM MAINTENANCE

- Teak will naturally weather to a beautiful silver-gray patina when exposed to the elements.
- To maintain or restore the original golden-brown color, clean the surface and apply a high-quality teak oil or sealer as directed.
- For heavy buildup or graying, use a teak cleaner and soft brush to restore the wood.

We recommend cleaning and oiling 2–3 times per year, or more frequently in harsh environments.

WHAT TO AVOID

- Do not use bleach, ammonia, or harsh chemical cleaners.
- Avoid pressure washers or high-pressure spray.
- Do not use steel wool, stiff brushes, or abrasive pads.
- Do not allow standing water to remain on the surface.
- Avoid placing hot items directly on the wood.
- Do not paint or stain.

NATURAL CHARACTER

Teak contains natural oils and may exhibit grain variation, small checks, and color changes over time. These are normal characteristics and do not affect performance.
